

Letter sent to Board of County Commissioners on \_\_\_\_\_

The Department is in the process of completing an official county road inventory for Kingfisher County, and is forwarding each Commissioner, a visual map that describes the roadway changes that occurred during field inspection. Any roads marked in red indicate new public roads discovered during the inventory that may be eligible for mileage certification, if the county agrees to add roadways to the county system. The roads in blue indicate roads that could not be accessed during the inventory and no longer meet eligibility requirements for mileage certification. The roads in yellow indicate roads the county has filed county action reports with the department, which have been processed into the database for previous years, but have not been drawn on the County Highway Map at this time. All other roadways should have been discussed at previous meetings, and will remain in the department's database as they reside today.

FY1, State Senate Bill #346 in 2001 stipulates that streets and roads in municipalities with a population of less than 2,500, and open to the public will be computed into the mileage certification. Municipalities between 2,500 and 5,000 in population that the county has agreed to construct, maintain, or repair will also be computed into the mileage certification. Any roadway in a municipality of more than 5,000 in population is not eligible for mileage certification.

Revised (03/14/05)

Verification of County Road System

We the undersigned County Commissioners for Osage County have reviewed the county road inventory and have found it to accurately describe the county road system at this time. In the event that there are county road additions or deletions to be made at this time certify that the roads marked for addition to the County Road System be indicated by the commissioner initialing next to the road to be added with the definition of a public road by being located on either existing section line right-of-way, public right-of-way through adverse possession or other dedicated right-of-way of record and are open for public travel at all times. These roads would best be described as part of the county road system and are eligible for inclusion in the county's certified road mileage.

Signed this 8 22 2004
